Bolinder Excavating
Attn: Mara Bolinder
5500 E Porcupine Ave.
Wasilla, AK 99654

SUBJECT: Approval of Rainfall Erosivity Waiver

This letter acknowledges our receipt of a Rainfall Erosivity Waiver request from Bolinder Excavating for the Echo Lake Woods project near Big Lake, Alaska. In accordance with the 2016 Construction General Permit, CGP, all construction activities within the state which disturb one acre or more of land are required to have their construction storm water runoff authorized through the issuance of the CGP unless otherwise waived through the approval of a waiver listed in Appendix D of the permit.

The submitted Low Erosivity Waiver Certification form and supporting documentation confirmed that your planned construction activity will begin and end within a period which has a rainfall erosivity factor less than 5. Through the submittal of the signed waiver form you are certifying that all necessary temporary erosion control measures will be installed no later than November 15, 2016 to meet the definition of final stabilization for arid regions as defined on Page C-15 of the 2016 CGP. As a condition and acceptance of this waiver you have either agreed to meet this definition of final stabilization through the installation of the temporary erosion control measures proposed in your waiver application or accept responsibility to periodically inspect and maintain the site until the criteria for final stabilization is met through other temporary non-vegetative measures.

If you have any questions concerning this authorization, please call (907) 334-2288.

Sincerely,

William Ashten
